Customer Advisory

Vessel Schedule During Drydock

May 21, 2025

Dear Customer and Partners:

Our vessel, the National Glory, is scheduled to enter drydock for maintenance and upgrades in Galveston, Texas, from June 27 through July 8.

The U.S. Coast Guard requires vessels to undergo regular inspection and maintenance in advance of the annual hurricane season in the Caribbean. Due to the constrained availability of drydock services during the busy summer months, we were not able to provide our customers with as much advance notice as usual.

The National Glory will complete her northbound voyage 305 in Houston on June 27 and immediately enter drydock. We will commence our voyage 306 southbound on July 9.

To supplement the Southbound service to San Juan during this period, National Shipping has chartered a marine tug and deep-sea barge to provide additional capacity and service options.

We apologize for this interruption and will keep you updated on the vessel's planned return to service. For the latest sailing schedules, please visit: www.natship.us.
